Responses to open-ended questions

Creation Date Wed, Jan 25, 2017

What were the instructor's major strengths?

Comments
He always knew exactly how to do the problems and explained in different ways.
Serious, efficient, didn't waste time
Smart, helpful, clear
explaining problems that the lecture instructor couldn't.
UNderstand how to approach different problems
Offer to assist in solving homework questions, but using different numbers so we still had to do our own work
answering questions, being available to help outside of class
went through a lot of different types of problems

What were the instructor's major weaknesses?

Comments
Sometimes he skipped steps and went to fast. Some tricks and tips we didn't know so it was hard to follow along.
Enthusiasm
none. he rocks.
none, only was a "no-show" once.
-Did not know what the instructor was teaching at the time
-Did not solve problems all the way through
--Was not usually prepared for recitation
sometimes miss steps because he thinks too quickly
didn't really explain what he was doing, often finished with incorrect answers and had to go back and redo them, the answers given sometimes differed from the answers given by professor/textbook

What aspects of this course were most beneficial to you?

Comments
Going over problems.
Help with webwork
youngnin clarifyknf all the concepts we learned that weren't graspable in the lecture
material was kept fresh in my brain through going to class consistently.
-going over the Webwork questions
Literally everything, because the actual class is very fast paced
it helped me realize that my TA's and professors care about me
practice problems

What suggestions do you have to improve the course?

Comments

He should make it more interactive so the students can engage more and actually do the problems, instead of the teacher doing all the work.

no recitation suggestions.

the lecture instructor (Duane-Lennard) should as good if not better of an instructor as the recitation instructor.

To be honest, Id rather Youngmin Park be my lecture instructor than Duane-Lennard.

-be aware of the section of the book that the instructor is on

try to review class topics before Cathy does

make sure the answers being given and how they're done is correct, its inefficient to work through problems when they're done incorrectly
